

Ancient Treasures examines the hunt for ancient treasure troves and hoards, whether they contain gold and jewels, or important artefacts that offer us a window on to the past. Part of the Treasure Hunters series, Ancient Treasures offers a cross-curricular mix of science & technology and history, with a fun, dramatic approach. Treasures covered in the book include the Roman Hoxne Hoard, the Anglo-Saxon Staffordshire Hoard, the extraordinary discoveries of the Rosetta Stone and Dead Sea Scrolls, and the South American treasures of Lake Guatavita. The book also looks at the motives for these searches, and the importance of responsible archaeology: were the treasure hunters driven by personal greed or glory, or did they embark on their quest with a historical interest and a desire to preserve the lost treasures?
