

Flying Fish ARE real! But not very many people really know much about them. They are some of the coolest creatures in the sea (and out of the sea, as you will learn.) This book is a delightful way for children (as well as adults) to learn all about one of the most fascinating fish in the ocean, the Flying Fish. First, you learn that they actually are real and do exist. Then you discover where they live, how they fly, why they fly, what they eat, and what eats them. Also learn about the different kinds of Flying Fish, how big they are, as well as many other interesting facts about them. There are lots of colorful photographs and illustrations to make learning interesting, to help visualize what Flying Fish really are, and will most certainly keep your child's attention. Be amazed as you see how these wonderful creatures live and fly. Note: This book is suitable for children ages 9 and older. For younger children, an adult can read the book to the child and enjoy the beautiful pictures together.
