Here are some upcoming conferences related to low dimensional topology. Princeton Summer School in Low-dimensional Topology and Symplectic Geometry, June , Low-dimensional topology and its interactions with symplectic geometry, Princeton RTG mini-conference, June Low-dimensional topology usually deals with objects that are two-, three-, or four-dimensional in nature. Properly speaking, low-dimensional topology should be. Ofcourse algebraic topology (preferably Hatcher) is a must. As pointed out in an earlier comment, low dimensional topology is really really.

This volume contains the lecture notes from the Graduate Summer School program on Low Dimensional. Topology held in Park City, Utah in the summer of . At the core of low-dimensional topology has been the classification of knots and links in the 3-sphere and the classification of 3- and . As part of the 50th anniversary program, the CRM will host a thematic month in low-dimensional topology (September). This is an area of research that.

Lecturers: Dr Daniel Mathews & Associate Professor Jessica Purcell, Monash University.
Synopsis: The study of low-dimensional topology is the study of spaces.

This book consists of a selection of articles devoted to new ideas and developments in low dimensional topology. Low dimensions refer to dimensions three and. Links to low-dimensional topology.
