A Comparative Government Biennial., China travel atlas(Chinese Edition),

The psychopharmacology of hallucinogens* Hallucinogenic drugs have been inhaled, ingested, worshipped, and reviled since prehistory. Human subject ramifications in hallucinogen experimentation are discussed. Future lines of research are suggested in human, animal, and tissue culture paradigms. The Psychopharmacology of Hallucinogens focuses on the properties, compositions, functions, transformations, and reactions of hallucinogens. The text also presents analysis of hallucinogens by Pavlovian conditioning, behavioral measures of hallucinogenic behavior, and drug model of hallucinosis.

THE PSYCHOPHARMACOLOGY OF HALLUCINOGENIC AGENTS. By DANIEL X. FREEDMAN, M. D.. Department of Psychiatry, The University of Chicago.
